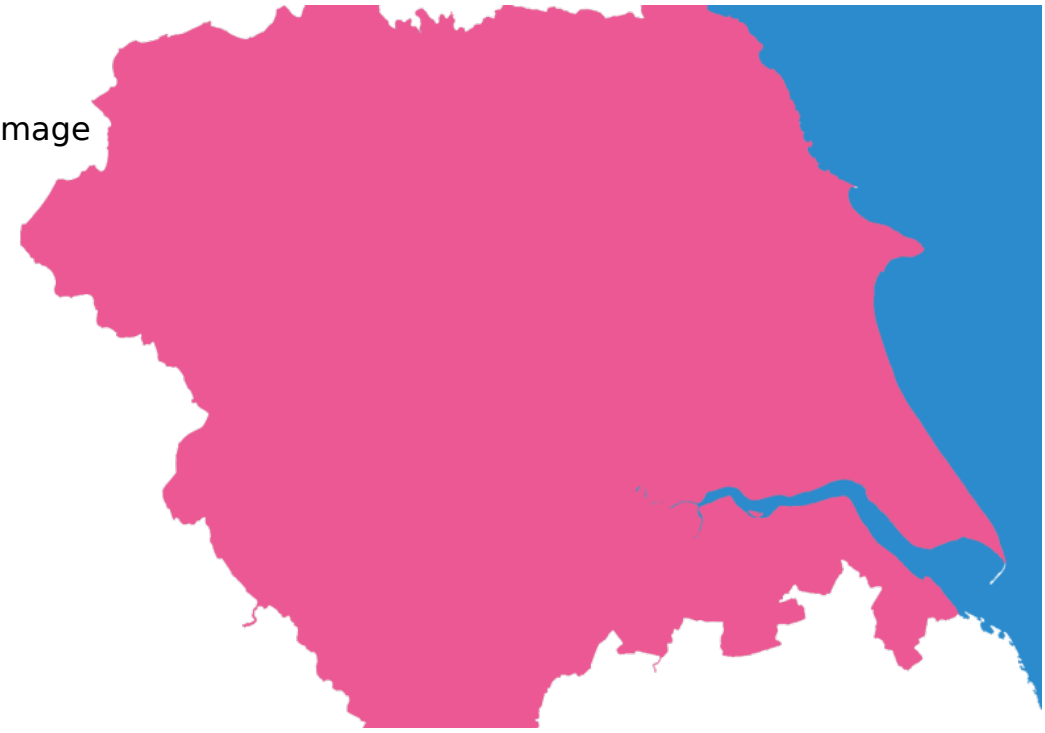
New data dashboard for Yorkshire and Humber newcomers

Image



We have published our brand-new Newcomers to Yorkshire and Humber dashboard.

This dashboard is aimed at people who plan or deliver local services in Yorkshire and the Humber. You might find you are often the first people who meet and respond to newcomers in the local area. You will know that people who have just arrived in an area often need more information and support than those who have had time to adjust and learn about life in the UK. These newcomers might benefit from information about key services for example, in their first language.

This dashboard provides an overview of the numbers and geographical patterns of new migrants who have recently come to live in Yorkshire and the Humber and were issued with a national insurance number (NINO).

Open the dashboard in a separate tab.
