Community Sponsorship

How can local communities help refugees settle and rebuild their lives in the UK?

Community Sponsorship gives local groups the opportunity to welcome and support refugees who have been resettled in the UK, helping individuals and families establish themselves in their new communities.

From finding suitable accommodation and accessing local services to building friendships and connections, community sponsors provide practical and emotional support that can make a lasting difference.

With the UK Government announcing developments to refugee resettlement and sponsorship routes in September 2026, there is renewed attention on the role communities can play in welcoming and supporting refugees.

Migration Yorkshire provides information about Community Sponsorship, including the different schemes and how interested groups in Yorkshire and Humber can find out more.

Find out more about Community Sponsorship and how to get involved.
